

 Swedish Innovation, quality & design

Pure Performance

Nor:disk is on a journey contributing to save the planet, one drop at a time by taking ware washing from a bulky, messy, and costly necessity to a lean and sustainable hub, suited for the modern kitchen.

We call it Pure Performance.

NOR:DISK
CLEAN SOLUTIONS

Sustainable ware washing in its true sense

Since 1987, Nordisk Clean Solutions has been providing the best in pot washing technology for commercial kitchens all over the world. Nor:disk delivers Pure Performance through Granule technology, Water-Smart technology, and practical services. Innovations which have been developed with performance, ergonomics, and sustainability in focus.

Two lines of efficient ware washing solutions

- The Granule range featuring our award-winning Granule technology, which enables the fastest and most efficient cleaning of pots and pans available, using less manpower, water, energy, and chemicals.
- Our high performing Water-Smart range, which makes more clever use of water through patented dual wash systems and optimized rinse cycles and minimizes consumption of water, energy, and chemicals.

Nor:disk also offers a range of practical services such as training programs, subscription models, and ware washing inventories.

Pure Performance all the way

Our sustainable ware washing solutions will help secure the health and wellbeing of your staff, manage your time, and minimize consumption of natural resources - all while running a profitable business.

Granule range

- + High hourly through-put
- + Optimized for pots and pans
- + Blasting granule cycles
- + Powerful water cycles
- + Unmatched low consumption of water, energy, and chemicals

Our Granule range manages your dirty pots and pans easier, faster, and more sustainably than any other pan washing method available today, saving on average 70% in water, energy, and chemicals. The range is tailored to meet the need from small to large kitchens.

Our two lines of ware washing solutions

Our product ranges are developed with the end user in focus, and optimised to secure profitability and sustainability for professional foodservice operations.

Water-Smart range

- + Slim quality design
- + Cook ware and table ware washing
- + Easy to place, use, and install
- + Efficient washing
- + Low water and energy usage
- + Combine models and tables for personalized and productive workstations

Our new innovative range of dishwashers are designed to be easy to use and deliver efficient wash result, while consuming a minimum of natural resources.

More about our services and solutions

Our services

- Free ware washing inventory

Do you have the right machine in the right place? We make a free inventory of your ware washing area to give you solutions of how you can save more water, chemicals and energy.

- Subscription models: Save Per Use

Save Per Use is a convenient, easy and secure way to finance your Nor:disk commercial dishwasher. Talk to your local sales representative to set up your subscription.

- Nor:disk Academy: Sharing knowledge to drive change

Online or on-site - it's up to you. We offer operators', sales, product and technical trainings.

Swedish heritage

Safe. Qualitative. Innovative. Sustainable. These qualities are often associated with Sweden, and also values that we as a Swedish company infuse into everything we do.

Nor:disk is based in Sweden, and deeply rooted in Swedish engineering. Our Granule range is assembled in our very own factory in southern Sweden. Our Water-Smart range is assembled in a dedicated production line in our factory in Milan, Italy. Direct access to both production processes help us stay on top of quality, and ensure that our products are produced under excellent working conditions and with respect for the environment.

Lifetime Commitment

This means having a circular way of thinking. The circular economy model of production and consumption involves sharing, leasing, reusing, repairing, refurbishing, and recycling existing materials and products as long as possible.

Today, more than 50% of the materials used to build our solutions are recycled, and are fully recyclable at the end of their life.

Did you know that Nor:disk works actively with the United Nations' Global Sustainable Development Goals?

Our ware washing technologies have many advantages, but the one we are probably most proud of is the sustainable effect they have on our planet. As a company, we also put great effort into lowering and controlling our own impact. Since you are reading this, we trust you do too. Together, we can make an important difference in our industry.

Choosing products from Nordisk Clean Solutions will help reduce your carbon footprint, but also contribute to the UN Global Sustainable Development Goals in many other ways.

Nor:disk works actively with SDG goals number 6, 7, 8, 12, 13, 14, and 17.
