CASE STUDY

GRANULDISK POT AND PAN WASHING AT CAMBERLEY HEATH GOLF CLUB

**WATER SAVINGS OF**  
**85.3%**

**GRANULDISK®**

# JUST ADD LESS WATER.

## QUICK SUMMARY.

Before:

- Manual potwashing in sinks
- Using 2 560 litres of water daily

After:

- 27 wash cycles/day with a Granule Flexi®
- Using only 376 litres of water daily

Results:

- **85.3%** water savings
- Improved working conditions for the staff and a better organisation of the work flow.
- Energy consumption is down by impressive 92 %

## THE SITUATION BEFORE.

Catering for the members of the Camberley Heath Golf Club daily and busy society events, plus regular weddings and social occasions in their Wessex Suites, the kitchen spent 8 hours a day washing pots and pans manually in two sinks. Water was running from the taps constantly. Consumption of water on a yearly basis was over 700.000 litres.

They also recognized a need to free up some time to allow the kitchen porter to do other tasks in the kitchen and a pot washing machine was the solution. The Chef saw GRANULDISK at a trade show and later at a live demonstration and he, there and then, was convinced of the many benefits of the GRANULDISK solution.

## THE SITUATION AFTER.

GRANULDISK gives the kitchen staff the freedom to work more efficiently and now the pots are going back to the kitchen cleaner, with old pots looking nearly new.

Without any need for soaking or scrubbing, the kitchen staff quickly took to using the Granule Flexi® pot washer with approximately 350 meals/day.

Today they run about 27 wash programmes a day, with only 16,5% of the water they used before in manual sinks. Furthermore with the new space saving setup it's possible to dish-wash everything in the same area, which makes it easier for the kitchen to handle.

*“After seeing it in action at another site, my mind was set and all I could think was - We must have one! In February 2018, we installed our Granule Flexi and have never looked back since.”*

David Heath, Executive Chef  
Camberley Heath Golf Club

**THE FUTURE.**

The Golf Club is looking at different areas to update the kitchen, encouraged by GRANULDISK bringing the kitchen up to date with more sustainable solutions.

*“GRANULDISK first caught my attention at Hotelympia a while ago. We were looking for a pot washing solution that would, in time, save us money and speed up efficiency in the kitchen. After seeing GRANULDISK in action at another site, my mind was set.*

*In February 2018, we installed our Flexi and we haven't looked back since. The Golf Club is always looking to encourage water savings.”*

David Heath, Executive Chef  
Camberley Heath Golf Club

**WATER CONSUMPTION**

(for pot washing per annum)

Before: **716 800 litres**      After: **105 500 litres**

Cost before: **£ 1 254**      Cost after: **£ 185**

GRANULDISK pot washing machines use PowerGranules®, water and a small amount of detergent to **mechanically scrub pots and pans clean**. The blasting power combined with high temperatures washes hygienically clean in a matter of minutes, **using up to 90% less water, energy and chemicals than any other pot washing methods**.

**A smart, sustainable and economic solution – eliminating pre-washing.**

GRANULDISK pot washing machines are a Swedish innovation which have been on the international market since 1987.
