Trolley For Washing Basket

Need a flexible and adaptable solution to ease work-flow and avoid heavy lifting in the wash room?

With a trolley for the wash basket you can adapt your pot wash solution to your individual space conditions and create an optimal work flow and an ergonomic way of working and less stress on the back and shoulders. Combine the trolley with pot wash models Granule Smart®, Granule Smart® +, Granule Gastro® and X5 Granule with one or more trolleys and baskets.

L x W x H (incl. handle, height from floor): 870 mm x 800 mm x 900 mm
Loading dimensions: 700 x 700 mm in two levels.

Delivery options: flatpack (standard) or pre-assembled (extra cost).
Article number: 24637

Optimised work flow and improved ergonomoy

Optimise your pot wash operation with the wash basket trolley for Granule Smart®, Granule Smart+®, Granule Gastro® or X5 Granule.

With Granule Gastro and X5 Granule, the trolley serves as an extra in- and outfeed table as well as a transport trolley to avoid heavy lifting. Load either the wash basket or dirty or clean washware.

With the Granule Smart® models you can set up a FreeFlow system using two baskets and two trolleys. A FreeFlow system naturally separates your pot wash area into clean and a dirty sides and maximises flow in the pot wash area, as it allows for multitasking. Fill or empty one wash basket while the other is being washed and minimise waiting time and speed up the process.

The trolleys also secure a more ergonomic work situation for the operator, as no heavy lifting or carrying is needed.

Tailored for Nor:disk pot washers

The trolley is designed to fit Nor:disk pot wash models Granule Smart, Granule Smart+, Granule Gastro, and X5 Granule. The height of the trolley

matches the loading height of the pot washers and servers for a smooth transition from trolley to pot washer. To save space, the dimensions of the trolley have been slimmed down to pure necessity: the wash basket.

Multiple areas of use

The trolley has two shelves which means that even if the top shelf is occupied by a wash basket, the lower floor can still be used for loading additional wash ware.

Easy to handle with 360-DEGREE brakeable swivel wheels

The trolley's four robust swivel wheels rotate at 360-degrees and allows you to effortlessly push the trolley in whichever direction you want. Easily park it by putting your foot on the wheel brakes.

Robust construction

The trolley is made of stainless steel and built to withstand a bit of wear and tear and rough handling in a busy pot washing area.
