CLEAN SOLUTIONS

Easy, sustainable, efficient

Top level hygiene
The D2 Master delivers top wash results that complies with the EN 17735:2023 and DIN 10534 hygiene norms.

Low ventilation needs – High electricity savings
The optional EcoExchanger® condenses the steam created during the wash cycles and recovers the heat energy. Equals lower ventilation need and electricity consumption.

Sequential Rinse Technology
The Sequential Rinse Technology decreases water and chemical consumption by up to 50%, which in turn helps to save energy.

On-site customizations
Wash and rinse temperatures, chemical dosing, and operating panel placement are all fully customizable on site.

Kick'n Wash
No more pressing buttons – keep your hands free! A simple kick on the pedal automatically lowers the hood and starts the wash cycle. When finished, the hood rises automatically. Eliminates repetitive motions and avoids staff developing work-related injuries (MSDs). Optional feature.

Reversible tables
Tables specially designed for use with the hood-type models of our Water-Smart range. Check our website for various options.

Intuitive use – no language barriers
The easy-to-read screen with icons and symbols. This helps you manage frequent staff turnover and save time, by avoiding repetitive operator trainings.
